SENTED TO THE PUBLIC. Gogo Root. The natives of the Philippine Islands never use anything else for washing their hair; you never see them bald, and it is quite common to see the females with hair from 5 to 6 feet long. By using this SHAMPOO WASH as directed, you will never be bald. The Proprietor offers the Wash to the public, being entirely confident that by its restorative properties it will surely arrest decaying hair, completely eradicate scurf, dandruff, and cure all dis eases of the scalp; it does not contain any poisonous drugs, but, by its cooling properties allays the itching and fever of the scalp.

Mr. Moone has succeeded in being able

SPECTACLES Vs. BLINDNESS.

Vision is justly described as the most important of our senses, and its loss is regarded as one of the greatest afflictions to which mankind is subject.

It is, therefore, of paramount importance that we should carefully use our sight whilst perfect, and that when, unfortunately, the help of Spectacles is felt to be necessary, the utmost care should be taken in the selection of them.

The late eminent Oculist, Dr. Soelberg Wells, testified that he had no hesitation in stating that the haphazard plan of selecting Spectacles employed by some Opticians—was frequently attended by serious consequences; that eyes were often per manently injured, which might, by skilful adaptation of glasses, have been preserved for years.

> S. R. GROOM, Esq., P.R.G.S., Barrister-at-Law, Singapore,

Writes :--I have used Glasses for twenty years, and have no hesitation in saying that, those supplied me by you are the best I have ever worn. I wear them with much satisfaction and comfort, and find the frames are especially convenient.

Valse Stella WE have often advocated the introduction if 25-cent and 50-cent pieces here, but the Colonial authorities concerned are so conservative and so niggardly with the subsidiary coinage that there is little hope of inducing them to move in the matter.

Ceylon, however, has, we observe, obtained what we have so long desired here. It is to have subsidiary coins of the value of 10 cents, 25 cents and 50 cents. The 50cent piece has been already introduced into Singapore, where it has proved a great convenience, and the Straits Times now advocates the introduction of the 25 cent piece into the Straits Settlements. There can be no doubt these coins would be very popular and would be largely need for payments under \$5. The one-dollar notes become so disfigured and torn, and the Mexicans and Yens are so heavy and unbandy, that these smaller coins would must

tobacco and pepper in Borneo, under the name of the East Borneo Planting Company, Limited. Although the prospectus has not yet been issued, the shares (3000 at \$50 each) have already been subscribed or and may be expected here on or applied for three or four times over. The Company will be registered here in two or three days' time, and the agents in Hongkong are Messra Gibb, Livingston & Co., Messrs E. E. Abrahamson & Co. inst, and may be expected here on or being the agents in Sandakan. That the prospects of the Company are good may be taken for granted from the eagerness to expected here on or about the 29th secure the shares, and from the fact that they are said to be at a prenisum of 20 per cent. almost before their allotment. The tobacco from North Borneo has been examined and reported upon by experts in England, and has been pronounced to be of excellent quality, rivalling that produced in Deli. As over 300,000 acres of land have been taken up for tobacco planting mostly by old planters from Sumatra, this opinion as the advantages of the soil of North Borneo for producing excellent results would seem to have been fully acted upon. But attempts have previously been made with equally good hope, and failure has resulted on account of inexperience and bad management. To avoid this danger, the Company has, we understand, secured the services of the most experienced managers; and Mr Abrahamson, who will act es Director in Borneo, has had some years of experience of tobacco-growing in Sumatra and has moreover been a resident of Borneofor some years. It is believed by the promoters of this new undertaking that no company has ever started under better auspices, and a gentleman of experience in buch matters, who has invested in the concern, has expressed his opinion that 50

> APPARATUS FOR COOLING ALE IN THEATERS. -Ay apparatus has been introduced in the Stangard Theatre, of New York, which in a very simple way solves the problem of securing a cool auditorium in summet. A fan is placed in the basement which draws air from outside the building and delivers it through the furnace pipes and registers. to various parts of the auditorium. The air before it reaches the fan is drawn over ice arranged on shelves. This cools it so that a temperature of 70 deg. is easily attainable. While the fan situated in the basement is delivering cool air, a second fan on the roof exhausts air from the interior, thus maintaining a constant change of atmosphere. The arrangement, in utilising the furnace connections, and in general detail, is remarkably simple, and could be readily applied to many places, such as hospitals, where coolness is all important. For a single evening's work about two tons of ice are expended. - Scientific

A CORRESPONDENT sont to a home paper the following account of a very artful dodge :-An ing mious method of making money was practised a few years ago by a man who possessed a powerful telescope. He generally took up a position at the end of a pier at Llandudno, and a fine clear day would point the instrument seaward to enable visitors to inspect liners going up and down channel. On one occasion he directed the telescope to the summit of the Great Orme's Head, and there night be seen two young lovers much as Peeping Tom' describes them. Customers camo fast, and the pennics rattled in quickly; when the news spread; only, however, amongst the new visitors, as it became known that the interesting young couple wore planted regularly, and had an interest in the day's takings.' This is indeed a commercial age. Making a business of billing and cooing seems to be the destruction of the poetry of life. After all, that is only what is largely done on the stage. But in the case of the Llandudno telescope a realistic effect was given in consequence of the onlookers supposing that the onlooked did not know they were being seen, whereas they received a commission on the

CHOLERA IN SARAWAK .- The Straits Times says :- The outbreak of Cholera in Sarawak presents peculiar features of more than local interest which entitle it to comment, unpleasant as the subject usually is. The local Gazette assorts that the disease broke out spontaneously. At least, there is no evidence of its having been imported. The outbreak is traceable to a prolonged drought which still continued by last advices. The supply of water ran short, even the inland rivers almost giving out. The people at the chief town had to rely on well-water, and would have been hard put to it, had not, fortunately, the newly-finished water-works furnished a supply at the very nick of time. As might have been expected, the natives, when the fell disease struck them down in quick succession, became thorough ly slarmed, and were more open to reason in the matter of their insanitary ways and habits. Hygienic precautions to which they hitherto had been utter strangers, met with ready compliance. The most noticeable phenomenon connected with the outbreak arises from the Chinese quarter of the town suffering but little, owing to its higher position and better water supply. The same exemption of people living on high lying ground has been noticed elsewhere in Sarawak. The Malays who delight to dwell in low localities under tidal influence and destitute of drainage facilities, suffered the in the name of Her Majesty is published in most, owing to their defiance of sanitary | Saturday's Gazette. It is as follows :laws. The mortality among them rose the higher from their habit of keeping stricken friends and relations indoors with them, the advantages of isolation being ignored. By last accounts, the disease was spreading inland. The consequence has been the almost total stoppage of the sage trade, the Malay sailers being too panie stricken to venture out of their homes. In water supply Singapore is far shead of Sarawak, and can face a prolonged drought with greater equanimity, though the increase of the population calls for additional provision in the near future. Low-lying land built over. unhappily, abounds enough in the city, to grouse grave fears should cholera take an epidemic form here.

WARNING TO PRANCE. New York, July 24 .- A London cable special to the Mail and Expresse says: Metz correspondent of the Paris Matin reminding his renders that all Germany's great historical campaigns have been coincident with the transformation of the German army, announces that the whole of the German army is now supplied with repeating rifles, and that therefore there is nothing in the way of an immediate attack on France. The writer further refers to the measures of great severity which are to be taken in Alsace-Lorraine as soon as the Kaiser arrives home again from his foreign tour.

No details of these new manaeuvres are given by the correspondent, but an editorial note in the Matin referring to the Metz letter explains that the lates devised scheme of Germany is of such a grave and delicate nature that it has not been considered advisable to publish the particulars of it. THE CHINA REVIEW.

PUBLISHED BI-MONTHLY, TENTH YEAR.

Intimations.

THIS Review, which was intended to meet the wants of many students of Chinese caused by the discontinuance of Notes and Queries on China and Japan,' has reached its Fourteenth Volume. The Review discusses those topics which are uppermost in the minds of students of the 'Far East' and about which every intelligent person con-nected with China or Japan is desirous of acquiring trustworthy information. It includes many interesting Notes and original Papers on the Arts, Sciences, Ethnology, Folklore, Geography, History, Literature, Mythology, Natural History, Antiquities, and Social Manners and Customs, etc., etc., of China, Japan, Mongolia, Tibet, and the Far East generally. Recently a new departure has been taken, and the Review now gives papers on Trade, Commerce, and Descriptive notes of Travel by well-known writers. It was thought that by extending the scope of the Review in this direction, the Magazine would be mademore generally

as it was deemed of special importance that | members of the various Consular, the Ima weekly budget of news should be prepared, perial Customs, and Hongkong Services, it was decided to issue it weekly. Sub- and also by the Missionary bodies amongst scribers at Home, and those at the Coart whom a high degree of Chinese scholarship Ports and in the interior, who find the is assiduously cultivated. The Overland China Mail, now a Legge, and Messrs Balfour, Watters, Stent. weekly compendium of news from the Far Phillips, MacIntyre, Greet, Jamieson, East, contains special Commercial intelli- Faber, Kopsch, Parker, Playfair, Giles. gence, special tables of Shipping, and other Piton, and Taylor, -all well-known names, indicative of sound scholarship and thorough

advantageous comparison, with preceding numbers.'-Celestial Empire. 'This number contains several article of interest and value.'-North-China Herald 'The China Review for September-Octobe fully maintains the high standard excellence which characterises that publi tation, and altogether forms a very interesting and readable number. Mecorologists will find an interesting and valuable contribution by Dr. Fritsche, on "the Amount of Precipitation (Rain and Snow) of Peking," showing the results

of observations made at the Imperial Russian Observatory at Peking, from 1841 to 1880. "Notes on the Dutch Occupation of Formosa," by Mr. Geo. Phillips, contains some interesting information, although much of it is second-hand. The Notices of New Books include a most generous and appreciative review of "The Divine Classic of Nan-Hua," and the Notes and Queries are as usual very interesting.'-North-China

Daily News. 'A substantial and reliable Review which all students of China and the Chinese would do well to patronise. - Chrysanthemum. The November-December number of the China Review contains less variety than usual, but the few articles are very interesting. The opening paper by Mr Herbert A. Giles on "The New Testament in Chineso" treats of a question that must necessarily be of great importance in the eyes of all missionaries. . . Mr E. H. Parker's "Short Journeys in Szechuen"

are continued, and a goodly instalment of these travels in the interior of China is given. Mr F. H. Balfour contributes a paper of some length entitled "The Emperor Cheng, founder of the Chinese Empire," which will be read with genuine interest by students of Chinese history. A few short notices of New Books and a number of Notes and Queries, one of which "On Chinese Oaths in Western Borneo and Java" might appropriately have been

placed under a separate heading, complete the number.'—H.K. Daily Press.

Trubner's Oriental Record contains the

following notice of the China Review:-The present publication, judging by the number now before us, is intended to occupy a position, as regards China and the neighbouring countries, some what similar to that which has been filled in India by the Calcutta Review. The great degree of attention that has been bestowed of late years upon the investigation of Chinese literature, antiquities, and social developments, to say nothing of linguistic studies, has led to the accumulation of important stores of information, rendering some such channel of publicity as is now provided extremely desirable; and contributions of much interest may fairly be looked or from the members of the foreign consular services, the Chinese Customs' corps, and the missionary body, among whom a high degree of Chinese scholarship is now assiduously cultivated, and who are severally represented in the first number of the Review by papers highly creditable to their respective authors . . . Some translations from Chinese novels and plays are marked by both accuracy and freshness of style; and an account of the career of the Chinese poet-atatesman of the eleventh century, Su Tung-p'o, by Mr. E. C. Bowra, la not only historically valuable, but is also distinguished by its literary grace. Beside notices of new books relating to China and the East, which will be a useful feature of the Review, if carried out with punctuality and detail, we are glad to notice that 'Notes' and 'Queries' are destined to find a place in its pages also. It is to be hoped that this opening for contributions on Ohlneso subjects may evoke a similar degree of literary seal to that which was displayed during the lifetime of its prodecessor in the field, and that the China Review may receive the support necessary to insure
